

CYBERTECH

MAKING THE CONNECTION

SCADA SYSTEMS INTEGRATION ACROSS YOUR ORGANIZATION

SUPPORTED TECHNOLOGIES

HMI AND SCADA

Cybertech has up-to-date and current experience with all standard DCS/PLC/Fieldbus communication protocols including:

- Foundation Fieldbus
- HART
- Modbus/Modbus+
- Modbus TCP
- EtherNet/IP
- DH+
- DF1
- DeviceNet
- Profinet
- ControlNet
- OPC
- MQTT

We also have experience with communication equipment such as Modicon Bridge-Mux, SSTs X-Link, line drivers and converters.

RTU

We support all RTU vendors.

With over 30 years of experience in connecting site operations to the corporate data level, Cybertech Automation is your trusted partner for SCADA system integration. Our comprehensive design and support capabilities empower you to enhance efficiency, optimize performance and streamline data flows across your operations.

ARE THESE YOUR CHALLENGES?

- Lack of standardization
- Execution staffing shortages
- Platform-specific specialist scarcity
- Silos across client operations
- Challenges posed by mergers and acquisitions
- Gaps between production operations and processing plants
- Requirements for rapid deployment
- Digital transformation requests impacting OT networks and control systems

THEN WE'RE THE SOLUTION

Cybertech understands the complexities of modern SCADA systems. Our tailored solutions and expert team ensure seamless integration, optimized performance and future-proof scalability. Partner with us for your SCADA system integration needs and embark on a journey towards operational excellence.

CYBERTECH

MAKING THE CONNECTION

SCADA SYSTEMS INTEGRATION ACROSS YOUR ORGANIZATION

READY TO SUPPORT

OFFICES IN EDMONTON AND CALGARY

120 EI&C/Automation specialized resources:

- HMI/SCADA System Integrators
- Programmers
- RTU
- PLC
- DCS
- Industrial Software
(Reporting, data visualization, dashboarding and historians)
- Electrical and Instrumentation Design
- Commissioning

SERVICES

OPERATIONS AND PROJECT SUPPORT

All configuration changes including adding/removing assets.

INITIAL DEPLOYMENT, REPLACING AND UPGRADING SOLUTIONS

- Supporting your first steps into advanced data collection
- RTU, PLC, Local HMI and SCADA systems
- Merging SCADA technologies
- Alarm management optimization

DATA STREAMLINING

- Enabling seamless dataflows from site to production
- Cleanup and standardization initiatives
- Consolidation of data sources for enhanced insights

ANALYTICS

- Bringing your data use into the 21st century
- Applying machine learning to see patterns and opportunities for process optimization
- Tracking equipment usage patterns and enabling advanced preventative maintenance
